Pluralsight is the leader in online training for serious developers, and IT admins. The company, which landed on Inc's 5000 Fastest Growing Companies list last year, started in 2004, moved online in 2008, and today boasts 750,000 users in more than 150 countries. We're looking for positive, passionate people who thrive in a fast-paced environment. We offer a vibrant culture, competitive pay and loads of other perks.

At Pluralsight, we don't just talk about our awesome “culture,” we actively work on improving it every day. We look for candidates who embody our core values—people who are truth seekers, entrepreneurs and eternal optimists. We believe in giving our employees the autonomy to thrive in their work, driving out fear, focusing on continuous improvement, and working toward a common purpose. If you thrive in an environment where you can truly make a difference and enjoy working with positive, passionate people, you've come to the right place.

Pluralsight is democratising online professional training and believe in using data to help inform our strategy and direction. As such, we have created a new department focused solely on making data a key part of the cultural identity. With Data, we can do great things and impact millions of lives and you can have a big part of accomplishing that goal.

**Analytics Engineer**

This position will primarily entail the following responsibilities; however, as Pluralsight and the Data Organization grow, so will the needs of this position.
